SKILLS

LANGUAGES
TypeScript, JavaScript, Python

FRONTEND
Next.js, React, React Native (Expo), Tailwind CSS

BACKEND
FastAPI, Supabase, PostgreSQL, Vercel, Railway

AI
OpenAI and Claude APIs, LangGraph, multi-agent systems, rule engines, MediaPipe

EDUCATION

Jeonbuk National University, B.S. in Computer Science and Artificial Intelligence
2024 – Present

Ijin Jo

Service Developer & Product Planner

SUMMARY

Service developer who plans and builds products with public data and AI. Designed a multi-agent analysis pipeline, a rule-engine plus LLM classification flow, and a GPS-based verification system, and owned each from planning and UI design to full-stack implementation and deployment.

AWARDS

2026 Grand Prize, 2026 Open Source SW Idea Hackathon Camp (JBNU College of AI Dean's Award) **(CHAEUM)**

2026 Excellence Award, 14th MOTIE Public Data Idea Contest, Product & Service Development Track (K-SURE CEO Award) **(EAAI)**

2026 Bronze Prize, 2026 JBNU AI·SW Competition (SW Track) **(SpeakUp)**

2026 Encouragement Prize, 3rd Honam SW Startup Idea Competition **(J:ON)**

2025 Excellence Award, 2025 Open Source SW Idea Hackathon Camp **(Toss-Talk)**

PROJECTS

EAAI — Export Decision Multi-Agent Platform | Solo · 2026
React, Vite, TypeScript, FastAPI, OpenRouter, Vercel, Railway

- Designed a seven-stage agent pipeline in which a separate reviewer agent validates the generated strategy.
- Linked K-SURE country and industry risk APIs to the export-fit score, with a 30-minute TTL cache and background refresh.
- Labeled public data as LIVE, CACHED or DEMO and marked AI-generated content separately.
- Locked responses to a strict JSON schema with automatic fallback on timeout or parse errors.
- Delivered country rankings, evidence and a five-step roadmap on one screen, with PDF export.

TRIPICK — GPS-Verified Travel Course Platform | Team · Planning, Frontend · 2026
React Native (Expo), React, NestJS, PostgreSQL, TourAPI 4.0

- Designed TRIPICK Score from completion rate, satisfaction and participant count; down-weighted low-completion reviews.
- Built automatic check-in within 50 m of each stop and speed-based location spoofing detection.
- Unified web and app TourAPI calls (CORS, key format) behind a caching proxy.
- Led service planning and UI design; built the React Native app and web client.

PROJECTS (CONTINUED)

J:ON — Youth Job Navigation for Jeonbuk | Team · Planning, Development · 2026
JavaScript, Python, scikit-learn, National Pension and education public data

- Back-calculated blocking conditions to show how many postings one more qualification would unlock.
- Cross-checked postings with National Pension enrollment data to show real headcount and hiring trends.
- Used public data only, with 11 consistency checks run automatically.
- Owned planning, data processing, design, development and the proposal.

GSBP — Account-Lending Scam Detection | Solo · 2026
Next.js 16, React 19, TypeScript, Claude API, Vercel

- Separated rule-engine verdicts from Claude API explanations, with a rule-based fallback.
- Showed approval likelihood, requirements and document checklists for eight banks.
- Shipped on Vercel with Korean/English support, rate limiting and keyboard accessibility.

CHAEUM — Vacant Storefront Diagnosis and Matching | Team · UI, Agent Design · 2026
Next.js, TypeScript, Tailwind CSS, FastAPI, LangGraph

- Designed and built the full service UI, from role-based entry screens to the listing map and dashboard.
- Designed the LangGraph multi-agent structure.

SpeakUp — Real-Time Speaking Coach | Team · Web Frontend · 2026
MediaPipe, faster-whisper, FastAPI, TypeScript

- Built the web frontend: live practice screen, coaching indicators, session report and progress dashboard.

Toss-Talk — AI Emotional Care Service | Team · Lead · 2025
React, Vite, OpenAI API

- Led planning, UI/UX, frontend, chatbot integration, interactions and the final presentation.

OTHER PROJECTS

Haenggan	Shared e-book reading where notes appear only up to each reader's progress Next.js, Supabase, epub.js · Solo
VINE	Learning agent that turns course notices into tasks and helps users resume work Next.js, Claude API · Round 1, national startup program
PRISM	Paper reproduction assistant that maps a paper to its code React, FastAPI · Solo
SPARK	Shrimp species identification tool that ranks candidates with evidence React 19, Zustand · Solo
